PROFESSIONAL SUMMARY

Python and Machine Learning Developer with 6 years of software development experience, including hands-on experience in Python development, PostgreSQL, SQL, machine learning, NLP, and Streamlit application development. Experienced in developing projects involving employee database management, loan approval prediction, student score prediction, and AI-based resume screening. Seeking opportunities as a Python Developer or AI/ML Developer to apply and further develop practical software and machine learning skills.

EXPERIENCE

Obul Consultancy and Contract Pvt. Ltd.

Python Developer / Machine Learning Developer Apr 23, 2020 – Apr 30, 2026

- Developed and maintained software applications using Python based on project requirements.
- Worked on Python, PostgreSQL, SQL, machine learning, NLP, and Streamlit-based applications.
- Collaborated with team members to understand requirements and deliver assigned project modules.

PROJECTS

AI Resume Screening System Jan 1, 2026 – Apr 30, 2026

Role: Python/Machine Learning Developer

Technologies Used: Python, Scikit-learn, Streamlit, PyPDF2

Description: Developed an AI-based Resume Screening System using NLP techniques. Implemented TF-IDF vectorization and cosine similarity to compare resumes with job descriptions and generate ATS-style match scores.

Role & Responsibilities:

- Developed an AI-based resume screening system to compare candidate resumes with job requirements.
- Extracted text from PDF resumes using PyPDF2 and performed NLP-based text preprocessing.
- Implemented TF-IDF vectorization and cosine similarity to calculate resume-to-job-description matching scores.
- Developed a Streamlit interface for resume upload and displaying screening results.

Student Score Prediction Apr 1, 2024 – Dec 31, 2025

Role: Machine Learning Developer

Technologies Used: Python, Pandas, NumPy, Scikit-learn, Matplotlib

Description: Built a machine learning model to predict student scores based on study-related inputs using regression algorithms and data visualization techniques.

Role & Responsibilities:

- Developed a machine learning application to predict student scores based on relevant input features.
- Performed data preprocessing, exploratory data analysis, feature preparation, model training, and evaluation.
- Applied Scikit-learn algorithms and evaluated model performance using appropriate metrics.
- Created a Streamlit interface for entering student details and generating score predictions.

Loan Approval Prediction

Apr 1, 2022 – Mar 31, 2024

Role: Machine Learning Developer

Technologies Used: Python, Pandas, NumPy, Scikit-learn, Matplotlib

Description:

Developed a machine learning model to predict loan approval based on applicant information such as income, credit history, loan amount, education, and employment status. Performed data preprocessing, feature encoding, model training, prediction, and evaluation using classification algorithms.

Role & Responsibilities:

- Developed a machine learning application to predict loan approval based on applicant and financial information.
 - Performed data preprocessing, handled missing values, prepared features, and explored relationships between input variables and approval outcomes.
 - Applied Scikit-learn classification techniques and evaluated model performance using classification metrics.
 - Created a prediction workflow for entering applicant details and generating loan approval predictions.
-

Employee Database Management System

Apr 23, 2020 – Mar 31, 2022

Role: Python Developer

Technologies Used: Python, PostgreSQL, Pandas

Description:

Developed an employee management system to manage employee information, roles, departments, salaries, and other employee-related records. Implemented database operations using Python and PostgreSQL to efficiently store, retrieve, update, and manage employee data.

Role & Responsibilities:

- Developed an employee management system to maintain employee records, departments, roles, responsibilities, and salary information.
- Implemented operations to add, update, delete, search, and retrieve employee records.
- Used PostgreSQL and SQL queries for storing, managing, and retrieving employee data.
- Applied validation and structured database operations to maintain data consistency.

EDUCATION

GIST(Geethanjali Institute of Science & Technology), JNTUA
B.Tech | 72%

2014

TECHNICAL SKILLS

Programming: Python

Data Analysis: NumPy, Pandas

Data Visualization: Matplotlib, Seaborn

Machine Learning: Scikit-learn, Regression, Classification, Feature Scaling, Model Evaluation

NLP: Text Preprocessing, N-Grams, CountVectorizer, TF-IDF, Cosine Similarity

PDF Processing: PyPDF2

Database: PostgreSQL, SQL

Web/App Development: Streamlit

Tools: Jupyter Notebook, PyCharm, VS Code, Git
